

Nickel-Plated Tap
UM510G

The Egea Drinking Fountain stands out from the other drinking fountains of the Street Furniture range because of its green colour. Made of iron, it has a round main structure and a nickel-plate pressure tap. Ø190 mm steel structure treated with Ferrus, a protective process that guarantees high resistance to corrosion. Epoxy coating and green RAL 6005 polyester paint coating. Push button tap (UM510G) with nickel-plated steel mounting bracket. Galvanised steel corner frame and drain grate.
